Cone style fill heads

Cone fill heads improve filling performance over capillary style heads and eliminate problems associated with capillary tubes (stringing, particles blocking tubes, pads wearing etc)

Good for thin products through thick latex paints.
 Interchangeable on existing volumetric
 and net weight filling machines.

Volumetric Filling Modules

ABA-FILL-TF1EA-S

(Original ABA-AF-3T-Module)

Shown at right three head module with PLC controls and operator touch screen on

Shown at left three head module with pneumatic controls

ABA volumetric modules are configured to work with existing conveyors, lid placers and press units. Order a one, two or three head unit and simply roll into place and start filling!
