

## Lid Placer

Our new High Speed Chute based 5 Gallon Plastic Lid Placer is specially designed to self center the lids on the containers as they pass below the unit. This makes this unit more forgiving for setup and operation and less worry for maintenance.

The ABA-LPHCS-5 5 Gallon Plastic Lid Placer can be fully integrated with the ABA-PRESS-5NR-14.5 5 Gallon Roller Lid Press unit and control panel with remote interface. The remote interface allows fault signaling and remote start/stop to be performed from a centralized control system. Automatic chute replenishment allows the unit to keep the dropper chute constantly charged ready for the next container. The lid stacker holds around 80 plastic container lids. Adjustable release paddles ensures that the unit will work with almost any shaped container.
