

ABA-COV-26

Fully interchangeable on existing paint filling machines, these heads completely eliminate the need to thread on and off the fill nozzle plates.

Features include:

- Quick release thumb screw clamps
- Clevis pin in lieu of old snap ring design
- Same nozzle pattern and tube diameters
- Common wear parts (gland packings and pads)

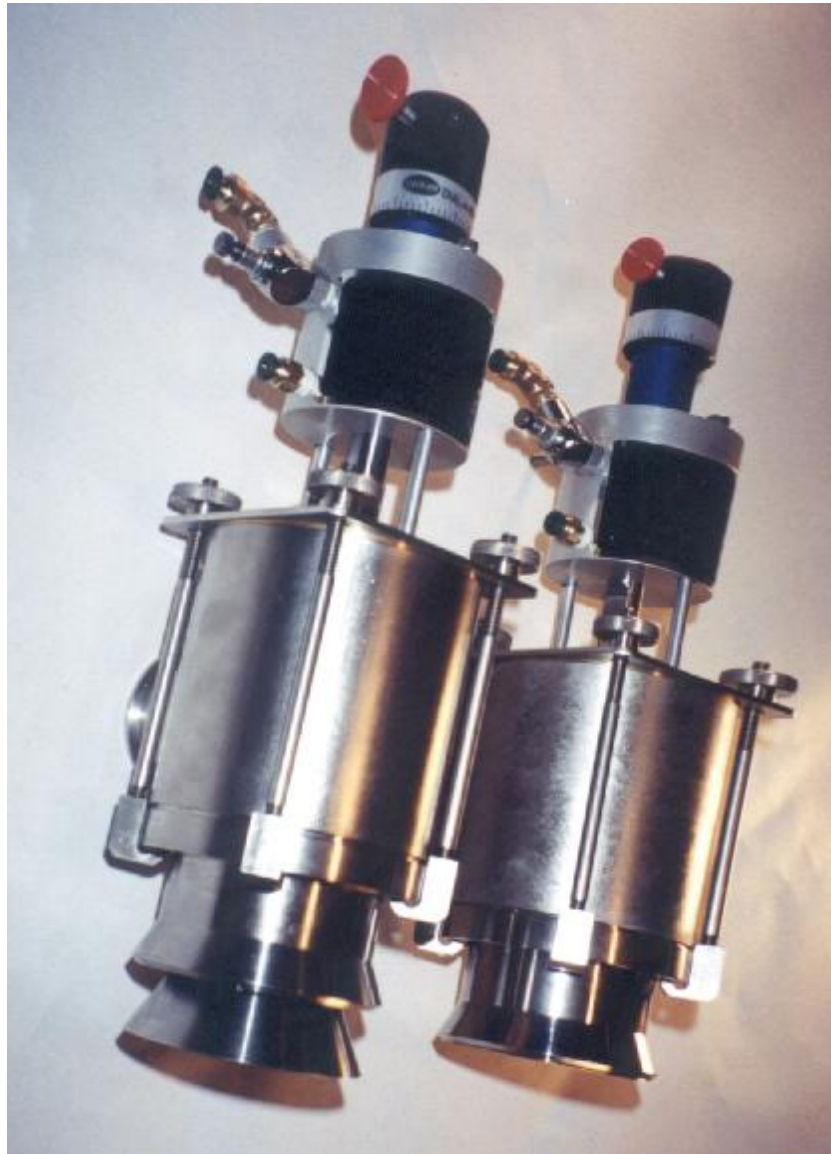

To order Quart/Gallon assembly (4" diameter valve body) specify assembly number ABA-COV-26 with:

ABA-COV-33 Nozzle 3/16" I.D. tube (Latex paint)

ABA-COV-46 Nozzle 3/32" I.D. tube (Oil paint)

ABA-COV-47 Nozzle 1/8" I.D. tube (Latex/Oil paint)

ABA-COV-85ASSY

As shown with the head open and closed, this gallon cone assembly is used for more viscous latex paints and eliminates problems associated with stringing from capillary tubes. The adjustable stroke air cylinder allows the cone opening to be infinitely adjusted from zero to one inch.
