## Semi-Automatic Lid Chute

ABA's newest design bridges the gap between a fully automatic lid placer and having an operator manually place each lid by hand. Our semi-automatic lid chute allows an operator to pre-load up to 4 lids at a time which frees him or her up to tend to other aspects of the fill cycle.

## ABALTD.COM

We've recently added drawings and parts lists to our new website to assist our customers with correctly identifying parts they need. To access the drawings, simply navigate to the Info/Drgs tab and select Drawings and Parts Lists
