

Anthony Barber Associates, Ltd.

Gallon Volumetric Pumps

ABA-99-PCV

Double acting positive displacement volumetric piston pump with power check valves

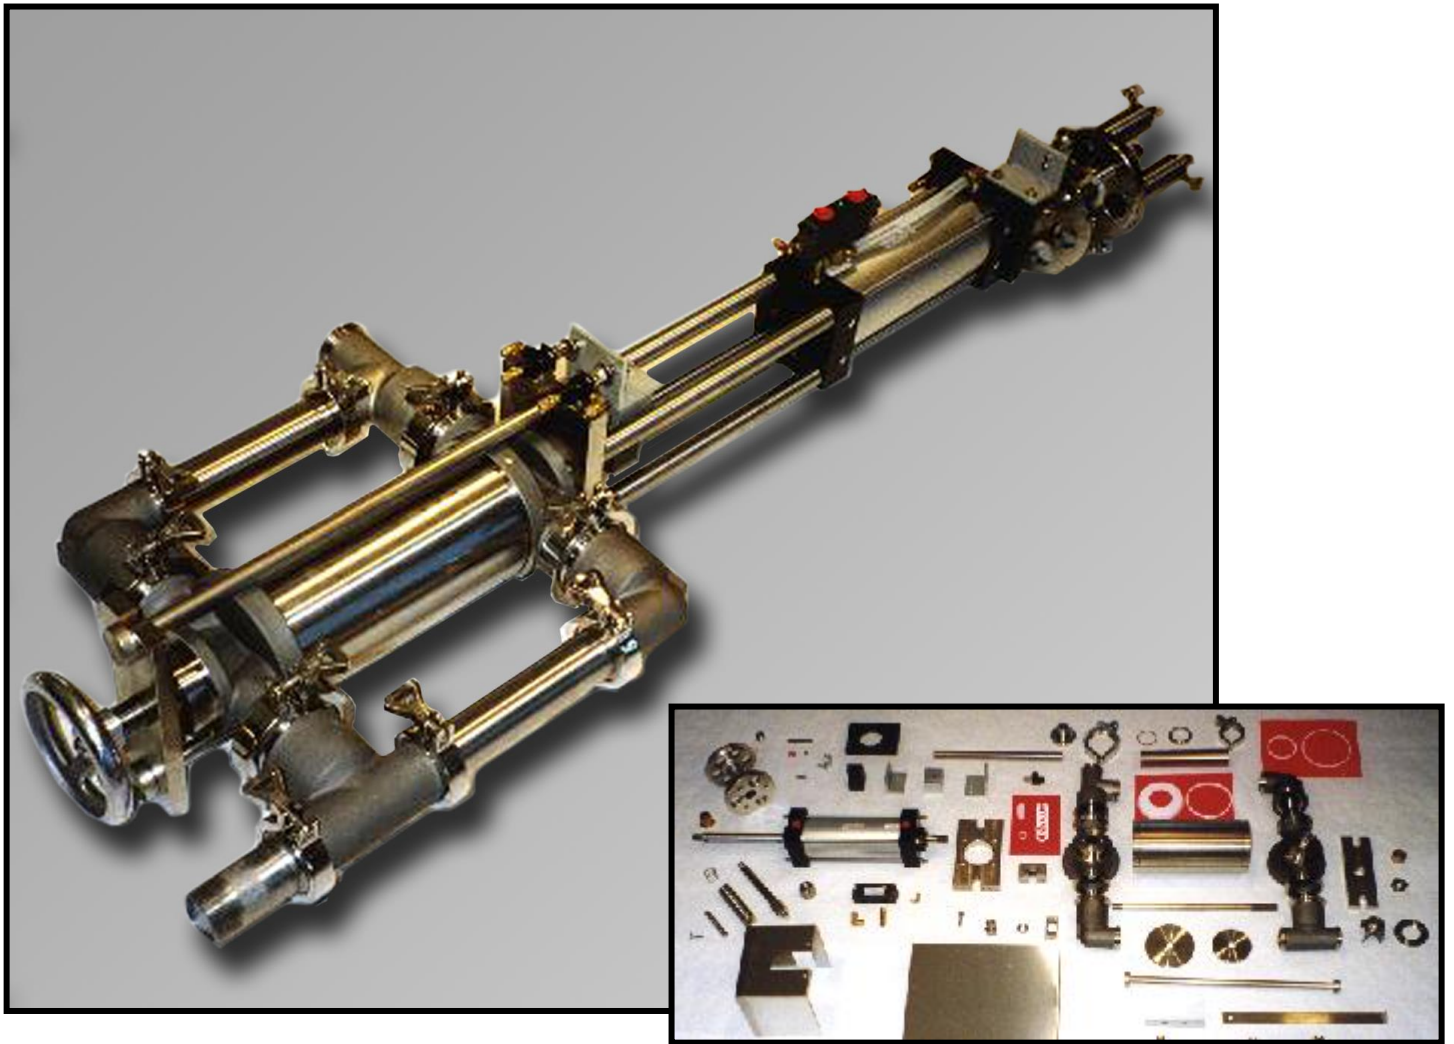

- Both sides of piston flooded with product, reducing cylinder and seal wear, and increasing the speed of the fill cycle.
- Pump displacement is from $\frac{1}{2}$ pint to 1 gallon per cycle with accuracy of $\pm 0.5\%$ for quarts and smaller and $\pm 0.25\%$ for gallons.
- Complete with 6-position volume selector turret.
- Allows for direct product feed.
- Eliminates the need for the filter tub.
